#### **GOVERNANCE**

01 – Interpretation of Board Rules 410-8-.02 and 410-8-.05

Several nursing programs across the state have contacted Stevan VanHook, Education Consultant, seeking clarification on rule amendments. The Board interprets Rule 410-8-.02 to mean that the NCLEX passage rate requirement for first-time test takers must be equivalent to the NCLEX passage rate requirement set by the program’s accrediting body for first-time test takers. Individuals retaking the exam will not be counted in the overall average rate. Additionally, Rule 410-8-.02(2)(a) and Rule 410-8-.02(3) specify that the passage rate calculation must include data from the preceding four calendar years.

#### **EDUCATION REPORT** – July 2024 Education Report - Stevan Van Hook, RN, MSN

NEC Updates		
Topic	Correspondence Description	Nursing Education Consultant Comments
Practical Nursing (PN) Programs Faculty and Preceptor Grid	PN programs are required to submit new faculty and preceptors for Board approval under the rules and regulations. A grid has been developed to assist the Board with the review of these notifications.	Reference EDUCATION 01 and EDUCATION 02 documents for the developed grids. These grids will be utilized, pending approval when new faculty and new preceptor notifications are reviewed by the NEC in the “Board Notifications” section of the Education Report.
Out-of-State Nursing Education Program Approval Survey Results	During the May 2024 Board meeting, the Board requested the NEC to gather information related to out-of-state nursing education program approval in other national jurisdictions.	<p>Reference EDUCATION 03 (PDF) and EDUCATION 04 (Excel) documents for survey results and analysis. 25 responses were received (24 were US jurisdictions/1 response from the North Mariana Islands)</p> <p>Definitions for out-of-state and distance education programs vary but the consensus reported aligns with the out-of-state interpretations being discussed by the Board. The majority of the governing boards who responded do allow clinical to be conducted in their state by out-of-state programs. For those that do allow clinical in their state, about 50% (13 regulate, 11 do not regulate; 1 requires registration with DOE in their state) regulate the educational programs located outside their state. The regulations vary.</p> <p>11 of the 13 regulating boards that regulate out-of-state clinical reported having a formal approval process for allowing clinical by out-of-state programs.</p> <p>Out of the 25 responses, only 9 programs reported effects on clinical availability for their in-state approved programs.</p> <p>No regulating boards reported requirements for priority placement for in-state approved program clinical placement.</p>

## **STRATEGIC PLAN**

### 01 – Ketamine Administration

The Board office received a letter from Dr. Brett Canon, President of the Georgia College of Emergency Physicians, inquiring about the permissibility of RNs administering low-dose or subanesthetic Ketamine. Upon review of position statements from the Boards of Nursing in Rhode Island and Arizona regarding this matter, the Board members discussed the following points:

- It can be safer than pushing IV morphine, Dilaudid or fentanyl if used in the appropriate dosages. It needs to be the appropriate MD prescribing the drug and the nurse needs an appropriate order. I don't think we need to get into the weeds of which dose to order as that is up to the MD but if we put out a statement, it should state subanesthetic dose. It can be used in very high doses to cause sedation and even induce general anesthesia but the same can be done with propofol, fentanyl, versed, and morphine if given in high enough doses. Ketamine also has many benefits that other pain medications don't. Small doses can cause respiratory stimulation and bronchodilation, which is great for patients with asthma or COPD, etc. The other analgesics can cause respiratory depression and release histamines, which can cause bronchoconstriction and also increase the chances of an allergic reaction. I think we have been getting so much correspondence on ketamine because physicians are starting to realize the value and the safety net of the drug compared to other analgesics and they are trying to lessen the potential of respiratory arrests in acute patient settings, especially as our patient population continues to age and has very complicated health histories.
- I feel like scope of practice wise this is no different than RNs pushing morphine IV or giving Percocet PO or any other analgesic with appropriate order and supervision.
- This is from the current FDA: KETALAR should be administered by or under the direction of physicians experienced in the administration of general anesthetics, maintenance of a patent airway, and oxygenation and ventilation. Continuously monitor vital signs in patients receiving KETALAR. Emergency airway equipment must be immediately available...
- I think if we are going to take the position they can administer low dose---it would need to be with a physician trained in emergency intubation present.
- I would be okay with this with proper orders, environment, and supervision when needed. Ketamine treatment.

The Board decided it is within an RN's scope of practice to administer low-dose Ketamine for pain management in a hospital setting under the direction and presence of a provider (physician, CRNA, NP) credentialed in emergency airway management and to add this opinion to the current Administration of Propofol Position Statement.

## **RULE WAIVER**

Tanner moved to deny the following Petition for Rule Waiver. Gresham seconded the motion and the motion carried unanimously.

01 – Ann McClellan

## **UPDATES**

### 01 – School Nurse Committee

The School Nurse Committee convenes monthly and has established a subcommittee comprising experienced school nurses. This subcommittee's primary objective is to draft a practice guidelines document outlining the roles and duties of school nurses in Georgia.

## 02 – Out-of-State Distance Education Programs – Clinical in Georgia

Stevan distributed a survey via NCSBN to inquire about out-of-state and distance education programs with other nursing regulatory boards. The survey yielded 25 responses, indicating that the majority of boards permit out-of-state programs to conduct clinical education within their state. Among the boards that permit clinical education, 13 boards oversee regulation while 11 do not. The Board requested Stevan to communicate with a few of these boards to understand how this process is functioning in their respective states.

## 03 – Military to LPN Transition Program

Gresham moved to approve forming a subcommittee for the Military to LPN Transition program. Tanner seconded, and the motion was carried unanimously.

Tara and Stevan are continuing to work with Commissioner Ross with the Department of Veteran Services on this program. Stevan met with a consortium from USG that is developing a military-to-RN bridge program. The Board needs a specific program for LPNs and decided to form a subcommittee from the Education Committee to include, Jessica Willcox, Darrell Thompson, Stevan VanHook, representatives from USG and TCSG, a representative from private programs, Tara Taylor and representatives from the Board's Education Committee. This subcommittee will research and determine the requirements of the Military to LPN Transition program. They will also draft Board rules related to this program.
